# RICHARD HEINBERG ALTERNATIVE COMMENCEMENT ADDRESS

Richard Heinberg, the Senior Fellow-in-Residence of the Post Carbon Institute, will be making an alternative address to WPI's official commencement speaker, Rex Tillerson, Chairman and CEO of ExxonMobil. Many members of WPI's graduating class believe that Mr. Tillerson, as the leader of a company that has spread disinformation on climate change to undermine American's trust in their scientific institutions, is not the individual they would like to hear from as they conclude their time at WPI. Instead, these students will be well-wished into their careers by Richard Heinberg, a man who supports a future that is both just and stable. You are invited to stand in solidarity with these students and to speak up for a future that will benefit our health, our economy, our society, and our planet as a whole.
